DETAILED ACTION

1. This application has been reconsidered as requested. The finality of the action mailed 6/18/03 has been removed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 25-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Bossard et al. (US 4,757,422).

Bossard et al. discloses a bipolar air ionizer apparatus and a method of removing ions comprising an air inlet, a high voltage source having a high voltage alternating current power supply (see col. 2 lines 19-24), an electrode (10) electrically connected to the high voltage alternating current power supply and configured to alternately generate positive polarity ions and negative polarity ions, an air outlet, and an air mover for causing an air flow comprising a foraminous filter (25) comprising an electrically conductive material coupled to ground and placed over the air inlet around the electrode on an interior surface.

Allowable Subject Matter

4. Claims 1-24 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Art Unit: 2836

Claims 1-24 recite, inter alia, a bipolar air ionizer apparatus and a method of removing ions comprising an air inlet, a high voltage source, a first electrode electrically connected to the high voltage source and configured to generate positive polarity ions and a second electrode electrically connected to the high voltage source and configured to generate negative polarity ions wherein the improvement comprises a foraminous filter comprising an electrically conductive material, the filter being coupled to at least one of a voltage source and ground, and the filter being positioned over one of an air inlet, the air outlet and the electrodes, such that air flowing into the air outlet, air flowing out of the air outlet or air flowing past the electrodes flows through the filter.

Le Vantine discloses an ionizer apparatus and a method of removing ions wherein the improvement comprises a filter comprising a metal screen being electrically coupled to ground and positioned over the air inlet but does not disclose two electrodes.

Partridge discloses an air ionizer in with positive and negative electrodes but does not disclose a filter comprising a metal screen being electrically coupled to ground

The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Art Unit: 2836

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
